

Welcome to publish with IJABE

The International Journal of Agricultural and Biological Engineering (IJABE) is an international peer-reviewed open-access journal sponsored and published jointly by the US-based Association of Overseas Chinese Agricultural, Biological and Food Engineers (AOCABFE) and the Chinese Society of Agricultural Engineering (CSAE). The ISSN 1934-6344 and eISSN 1934-6352 numbers for the IJABE have been registered, which allows IJABE to publish in both online and hard copy. Open access IJABE provides easy sharing of knowledge, is thus in the best interest of authors and readers, and increases the availability, accessibility, visibility and impact of the papers, and journal as a whole.

IJABE aims at facilitating the development of agricultural and biological engineering, promoting the prosperity of academics, and improving international academic exchange and cooperation. This journal strives to publish the latest high-quality research from a diverse array of topics from the international community. Our readers are from the international scientific community as well as educators, policy makers, agricultural engineers and scientists, and interested members of the public around the world. The major technical categories that the journal covers include, but are not limited to: Overview Articles (OA), Applied Science, Engineering and Technology (ASET), Animal, Plant and Facility System (APFS), Power and Machinery Systems (PMS), Natural Resources and Environmental Systems (NRES), Information Technology, Sensors and Control Systems (ITSCS), Renewable Energy and Material Systems (REMS), Structures and Bio-environmental Engineering (SBEE), Safety, Health and Ergonomics (SHE), Agro-product and Food Processing Systems (AFPS).

IJABE has been indexed and abstracted by the Web of Science Core Collection since 2013. According to the 2022 update of Journal Citation Reports® (JCR2021) released by Clarivate Analytics on June 30, 2022, the latest impact factor (IF) of IJABE is 1.885, ranking the 7th out of 16 SCI-indexed agricultural engineering journals, located in Quartile 2 (Q2). Welcome to publish with IJABE!

We are sure that with the rapid evolution of the digital age and interdisciplinary technologies, we are being offered tremendous opportunities to shape the future of our field and make a visible impact with the journal. IJABE, via strict and serious peer-review, ensures to serve as the leading global source of high-quality papers in the field of agricultural and biological engineering. It is a win-win among authors, readers, and editors. Therefore, we are thrilled to work with all of you—readers, authors, reviewers, section editors, Editorial Board members, and IJABE professional staff—to support and promote the further development of IJABE as the ideal platform to report new scientific findings and exchange new ideas. Together for a shared future, we will continue the success of IJABE and bring it to the next higher level. We welcome your comments, suggestions, and feedback at ijabe@ijabe.org.

Thank you to all our authors, readers, reviewers, and editors!

The logo for the International Journal of Agricultural and Biological Engineering (IJABE) is displayed in a white circle. The letters 'IJABE' are in a stylized, green, sans-serif font.

Editor-in-Chief: Dr. Prof. Wang Yingkuan
